Job Description

DevOps Engineer (m/f)

With over 37 years of experience in high technology together with its integrated skills in the areas of space technology and telematics, OHB Group is ideally positioned as one of the leading independent forces in the European space, aeronautics and telematics industry.

In July 2018, OHB Hellas was created as 100% subsidiary of OHB SE marking the implementation of a space system company in Greece. We have the passion to develop and implement space projects in close collaboration with public institutions and selected local partners.

A career in space does not have to be a dream. OHB is constantly looking for new pioneers around the entire world and in all corporate segments. OHB is glad to be able to generate such opportunity in Greece for high profile candidates that share our enthusiasm for space.

OHB Hellas is seeking an engineer (m/f) that will reinforce the team able to support the initial setup of the DevOps concept within OHB with the necessary flexibility and to define a sustainable target organization based on the key production principles

Detailed task description:
- Defining the implementation approach and assessing the business case for implementing a cross company DevOps team
- Identifying requirements (software, hardware, process, resources etc.) of implementing DevOps in an integrated team
- Designing and developing new functionalities and enhancements
- Being involved in Development, Continuous Integration and iterative development
- Writing unit tests for new and existing code
- Performing code reviews and writing technical documentation

Skills and Qualifications:
- Education in the field of computer science (Master degree, or Ph.D)
- Strong knowledge in Linux administration skills and automation
- Programming skills: Python, Java developer, Linux environment and C/C++
- Experience on common CI/CD practices
- Knowledge on Kubernetes, Cluster deployment, administration, RBAC, HELM Deployment, Docker, SOPS (Deployment:Terraform/ Terragrunt, Azure cloud and Azure Services
- Experience on AKS, ACI, AzureFunctions, AAD
- Experience in designing, building, and maintaining efficient, reusable, and reliable code
- Experience in code reviews, in maintaining code quality, organization and automation
- Agile methodology of working
- Willingness to take on challenges, show resiliency and like to always learn new skills
- Flexible to fulfil other tasks relevant to the daily work in a new company
- Identification of bottlenecks and bugs, ability to propose solutions to these problems
- Experience in leading a team of minimum 5 people
- English (proficient level) and German (good/fluent).

Conditions:
- Position: Full time
- Location: Marousi (Athens), Greece
